Cookbooks - Chef Supermarket While Chef has the responsibility to keep it running and be stewards of its functionality, what it does and how it works is driven by the community. The chef/supermarket repository will continue to be where development of the Supermarket application takes place. About Cookbooks â€" Chef Docs The chef-client uses Ruby as its reference language for creating cookbooks and defining recipes, with an extended DSL for specific resources. The chef-client provides a reasonable set of resources, enough to support many of the most common infrastructure automation scenarios; however, this DSL can also be extended when additional resources and capabilities are required. Chef Community Cookbooks Â· GitHub This repository is for public community cookbooks that are shared on the supermarket site. GitHub is home to over 31 million developers working together. Join them to grow your own development teams, manage permissions, and collaborate on projects.
